SBY inaugurates Sisi-Nubi 2B, Ruby gas projects

Photos: Khalsa

President Susilo Bambang Yudhoyono (SBY) inaugurated on Sept. 15 two oil and gas projects in East Kalimantan including the Sisi-Nubi phase 2B project, and the Ruby gas field development project.

"These projects shows the hard work of the oil and gas industry players which continue commitment to look for new oil and gas reserves in Indonesia," said Acting Chairman

of upstream oil and gas authority SKK Migas, J. Widjonarko in a statement issued by the Ministry of Energy and Mineral Resources (MEMR). The two projects require combined investments of Rp 13.6 trillion, the statement added.

The Sisi-Nubi Phase 2B operated by Total E&P Indonesia is part of the development of Sisi-Nubi field in Mahakam Block located offshore of Kutai Kartanegara, East Kalimantan,

Total said in a statement.

Sisi Nubi Phase 2B project consists of installation of two new wellhead platforms (namely WPS2 in Sisi field and WPN3 in Nubi field) together with pipelines to existing platforms on each fields, it said.

Sisi Nubi Phase 2B is part of the approved plan of development the Sisi-Nubi Phase 2 (Phase 2A and 2B) which will contribute 35 additional wells and the budget of US\$1,033

Alhamdulillah salah satu projek **PT. Gunanusa Utama Fabricators** menjadi salah satu artikel dari majalah OGE Asia - Oil, Gas and Electricity. Artikel ini terdapat pada edisi September 2014 halaman 78 di rubrik Company.

All of the projects' engineering and fabrication work was carried out in Indonesia with contracts awarded back in Jan. 27, 2012 to PT Gunanusa Fabricator and PT Rajawali Swiber Cakrawala. "The involvement of national companies, national products and engineers in those projects further exemplifies Total E&P Indonesia's commitment

The Upstream Oil and Gas Regulatory Task Force (SKK Migas)'s deputy for planning, Aussie Gautama, said that Mahakam had enough gas reserves to continue producing until 2032.

"There is still a significant amount [of gas] in Mahakam. If I'm not mistaken, it can last until 2032, but at a lower rate than now," Aussie said

Susilo Bambang Yudhoyono

Semoga dengan masuknya artikel ini di majalah-majalah Oil & Gas, Gunanusa semakin dikenal oleh dunia serta mudah mendapatkan projek lainnya..Amin
