

ASME Team Leader Recommend ASME & National Board Office to issue the Certificates of Authorization to PT. Gunanusa Utama Fabricators

1 October 2018

By: Muslimin (corporate QC Manager)

With a hard efforts, finally ASME Stamp Qualification can be carried out successfully and PT. Gunanusa Utama Fabricators is recommended by ASME Team Leader to get a Certificate of Authorization to fabricate Power Boilers, Pressure Vessels and Power Pipings with ASME Stamp of U, U2, S, PP and also National Board Stamp of R. Scope of PP and R are new programs of 4 times PT. Gunanusa Utama Fabricators held the ASME Stamp Certificates.

The success of PT. Gunanusa Utama Fabricators obtained recommendation from ASME Team Leader is as a result of the hard work of all team members involved, starting from the preparation of design, procurement, material control, fabrication of the model and preparation of QC Manual & procedures, then pre-Joint Review and the last is the Joint Review. The last two days of the Joint Review on 27-28 September 2018 were very tiring days, all person involved shall worked hard until nigh to close the finding. During the Joint Review, all team members have to be placed and ready every time to close every any comments and issued NCRs. The comments and NCRs have to be closed in the same day as requirement to get recommendation to pass the qualification. There are many findings, observations and recommendations from ASME Team Leader and Authorized Inspector which are very useful for improving Quality System of PT. Gunanusa Utama Fabricators.

Hopefully, PT. Gunanusa Utama Fabricators get an ASME project soon, so the Quality System can be improved and applied in the real jobs.

Gunanusa Bisa !
